

## Business Integrity and Sustainable Development

Doing good business means doing things the right way. Creating positive social impact is integral to companies operating in the energy and natural resources sector.

Adopting strategies and internal controls to ensure ethical operations, and incorporating international standards for sustainable development and business integrity as part of resource development agreements, financing arrangements, and other contracts, is key to thriving in the sector.

Whatever your business needs, we can help you do good business, the right way. We are focused on bringing you the highest level of support in the following areas:

- Sustainable development
- Green financing, including green bonds
- Socially responsible investing
- Anti-bribery and corruption
- Business and human rights, including employee health and safety

### Representative experience

EDF on the introduction of a sustainability pricing mechanism indexing the margin of its €4 billion syndicated revolving credit facility to three of its environmental, social, and governance criteria.

Training to the Government of Malawi as regards to
