

Mining and Resources: Mining

Mining companies face a range of challenges. Health, safety, and environmental issues. Complex regulatory due diligence. Cybersecurity risks. Weakened commodity prices. At Hogan Lovells, we work with mining clients in all aspects of the industry. Our global footprint allows us to advise in key jurisdictions for mining operations and outbound investment.

Supported by innovative solutions for corporate transactions, finance (including streaming transactions), securities, mine development, concessions, dispute resolution, intellectual property, and cyber risk, we anticipate issues before they become problems. Our clients include both privately and publicly traded mining companies engaged in mineral development. This includes the gold, copper, coal, silver, nickel, diamond, molybdenum, uranium, and platinum industries across the globe.

Representative experience

Ranked Band 1 for Energy: Mining & Metals by *Chambers USA 2015*.

Advised Royal Gold, Inc. on multiple precious metal streaming transactions, with a 2015 aggregate value exceeding US\$1.4bn.

Represented Goldman Sachs as advisor to BHP Billiton on their £75bn merger with Rio Tinto Zinc.

Represented the underwriters on a proposed IPO, Hong Kong listing, and Rule 144A placement of shares of a Chinese molybdenum and copper mining company.
