

False Claims Act: A review of 2017

23 March 2018

Hogan Lovells

The pace of False Claims Act (FCA) litigation and settlements remained just as furious this past year as it had during the previous presidential administration.

Companies in all sectors of the economy who do business with the government, or participate in government programs, continue to face the threat of FCA enforcement. At the same time, the Supreme Court's jurisprudence expounding on the FCA's "rigorous" materiality standard has created new lines of defense. Understanding how recent court decisions could affect your business is critical. That's why we have published "False Claims Act: A review of 2017." This report reviews the key developments of the past year, and discusses some discernible trends in government enforcement of the FCA.
