

Infrastructure and Equipment

Your infrastructure and equipment powers your growth and profitability. But wading through authorizations and approvals can be frustrating.

The team at Hogan Lovells assists clients on navigating equipment authorization, product development, and infrastructure deployment matters, including FCC approvals, legal compliance and technical reviews, and commercial negotiation issues.

Whether you are dealing with equipment authorizations, technical rule interpretations, or marketing restrictions, we can help. Certification requirements? Technical, power, or radiation limits? Safeguarding or building new infrastructure? We have experience handling the regulatory and compliance issues you run across. From legal, to policy, to complex engineering and technical concepts.

That's why some of the world's largest communications network operators and equipment manufacturers turn to Hogan Lovells.
