

Broadband, Internet, and E-commerce

The internet has become a part of everyday life. Whether you are a start-up or a multinational corporation, complex legal, practical, and commercial issues arise from doing business online. The legal and regulatory impacts are vast, and we can help map your site, platform, or app. We simplify the drafting of Ts&Cs, cookie consent, disclaimers, and other website agreements.

Our internet and e-commerce lawyers advise on all aspects of B2B and B2C services from domain name registration, site development, and privacy and information management, right through to commercializing your IP and protecting your brand. This enables us to develop effective solutions to suit your businesses requirements in the digital marketplace.
